**We are a Christian Family Business.** That means that an owner is always on site, from the initial bid, to the completion of the project.

**We are hardscape specialists.** We create extensive outdoor living areas complete with fireplaces and outdoor kitchens; as well as smaller projects like patios, sidewalks, and flower beds.

**We put our name on our work...and take pride in what we do.** We consider each project, large or small, to be a reflection of our family name. Our pride in our work shows in the small details that we consider "standard procedure." For example, we return the lawn to it's original condition by seeding and strawing any damaged areas. Our retaining walls include necessary drain tile, filter fabric, adequate fill material and geogrid reinforcement when necessary. In the event of planting walls and beds, the beds are filled with dirt as a standard procedure, with mulch and weed barrier upon request.

We specialize in: Custom Waterfalls & Water Features. Outdoor Kitchens, Outdoor Fireplaces, Patios and walkways, Retaining Walls, Stone Veneer, Sod Installation, Concrete Flatwork, and Fencing.
